Overview

Final-year Ph.D. student focused on speech AI, with research in deepfake speech detection, speaker recognition, and speaker age estimation. Experienced in developing new training pipelines and model architectures, leveraging state-of-the-art self-supervised speech foundation models and speech LLMs to improve downstream tasks.

Education

- **Nanyang Technological University** — Singapore
  Doctor of Philosophy (Ph.D.) in Computer Science; GPA: 4.83/5.0 — *Jan 2023 - Jan 2027 (expected)*
- **Nanyang Technological University** — Singapore
  Master of Science in Artificial Intelligence; GPA: 4.55/5.0 — *Jan 2022 - Jan 2023*
- **Ho Chi Minh University of Technology (HCMUT) - Vietnam National University** — HCMC, Vietnam
  Bachelor of Engineering in Computer Science; GPA: 8.57/10.0 — *Aug 2017 - Aug 2021*
  One of 40 selected students among 300 Computer Science students for the Talented Engineer Program.

Work Experience

- **American Express Innovation Labs** — Singapore
  Incoming Data Science Intern — *May 2026 - Aug 2026*
- **Hong Kong Polytechnic University** — Hong Kong
  Research Student Attachment Programme — *Feb 2025 - Jun 2025*
  - Designed and evaluated novel training techniques for deepfake speech detection [[5]].
  - Implemented a proof-of-concept explainable Deepfake Speech Detection system using SpeechLLM Qwen2.5 Omni model.
- **Zalo AI** — HCMC, Vietnam
  Associate AI Engineer (Full-time) — *Aug 2021 - Jan 2022*
  - Contributed to *KiKi* - the first Vietnamese voice assistant deployed on smart speakers, cars, and smartphones.
  - Parsed ASR outputs into intents and implemented intent-ranking logic for voice queries.
  - Built a streaming pipeline to update NER entities by crawling and processing data from multiple websites.
  - Analyzed & visualized ∼150,000 daily user logs to diagnose failure cases and prioritize fixes.
- **Innotech** — HCMC, Vietnam
  AI Engineer (Full-time) — *Nov 2020 - Jul 2021*
  - Built centralized log management and deployed AI models for streaming anomaly detection on servers using log messages.
  - Adapted reinforcement learning (Deep Q-learning, AlphaZero) to solve FreeCell.

Projects

- **Deepfake Speech Detection (Research Project funded by AI Singapore)**
  Developed deepfake speech detection methods that enhance both architecture and optimization. Designed temporal–channel modeling for multi-head self-attention [[1]] and addressed gradient misalignment introduced by data augmentation [[5]], improving robustness and cross-condition generalization for synthetic speech detection.
- **Homomorphic Encryption Speaker Verification (Research Project funded by OCBC Bank)**
  Implemented an end-to-end speaker verification pipeline, training SOTA models and enabling privacy-preserving inference under fully homomorphic encryption.
- **Interpretability of Speech Signal under Adverse Conditions (Research Project funded by Temasek Lab)**
  Developed a novel knowledge distillation-based training method that transfers knowledge from large robust speaker verification models to compact, deployment-friendly models [[2]].
- **Identifying Speaker Characteristics through Audio Profiling (Research Project funded by Temasek Lab)**
  Developed a gender-aware mixture-of-experts Transformer model that integrates self-supervised speech representations to accurately estimate speaker characteristics like age and height directly from speech signals [[8]], [[12]].
- **Multi-camera multi-people tracking (Undergraduate Thesis)**
  Implemented system a tracking people across multiple non-overlapping cameras using DeepSORT for tracking and ABD-Net model for feature extraction.

Honors and Awards

- 1st place winner in FAME Challenge, ACM-Multimedia, 2024.
- ISCA INTERSPEECH Travel Grant, 2024.
- NTU Research Scholarship (full-ride scholarship awarded to graduate students).
- KSYS-CUBE Scholarship 2021 (Awarded to 40 excellent HCMUT students annually).
- Acecook Happy Scholarship 2021 (Awarded to 200 outstanding students among 17 universities across Vietnam).
- TRUaire Scholarship 2019 & 2020 (Awarded to 40 selected HCMUT students annually).

Skills Summary

- **Languages:** Python, Java, C++, Bash, SQL, LaTeX
- **Frameworks:** HuggingFace, ms-swift, fairseq, PyTorch, Kafka, Faust, MLflow, Vert.x, Django
- **Tools:** Docker, Elasticstack, PostgreSQL, MySQL, Vim, Git

Languages

- **English:** Fluent (IELTS Academic: 7.5).
- **Vietnamese:** Native.

Academic Service

Reviewer: ICASSP (2026), INTERSPEECH (2026), SLT (2026).
